

src/main/java/local
_search/candidate_type
/RandomCandidate.java

```
graph TD; A["src/main/java/local  
_search/candidate_type  
/RandomCandidate.java"] --> B["java.util.List"]; A --> C["problem.definition.State"];
```

The diagram illustrates the imports used in the file `src/main/java/local_search/candidate_type/RandomCandidate.java`. Two blue arrows point from the top box to the bottom boxes, indicating the source of the `List` and `State` classes.

java.util.List

problem.definition.State
